Stepan Devyatkin

Technical Artist | Rigger • Tools Developer

danji.work@icloud.com discord: danji_animations

ABOUT ME

Rigger / Tech Artist with 4+ years of experience. Passionate about what I do and always happy to help with any questions!

Previously worked for: **Palytra Production** - an indie animation studio in Sweden.

I develop complex character rigs and custom plugins for Maya/Blender, then take the work further into UE5 with Blueprints and custom HLSL shaders. Along the way, I build utilities and tools that streamline animation workflows and boost productivity.

SKILLS

Programming	Python, MEL, C++, Bash, UE5 (Blueprints, Materials/Shaders)
UI and libs	Qt / PySide6
DCC	Maya, Unreal Engine 5, Blender, currently exploring Houdini
Math	linear algebra, vectors, matrices, quaternions

EXPERIENCE

2022 - Present

- 4+ years of hands-on experience rigging characters, with 2+ years of programming alongside, including 1 year of production work at an indie studio.
- Built custom systems, C++ plugins, and Python tools to optimize pipelines and boost productivity.
- Designed and built character rigs of varying complexity, including advanced facial setups.
- Featured on industry platforms including 80 Level.
